

28 SEPTEMBER 2023

- PRESS RELEASE -

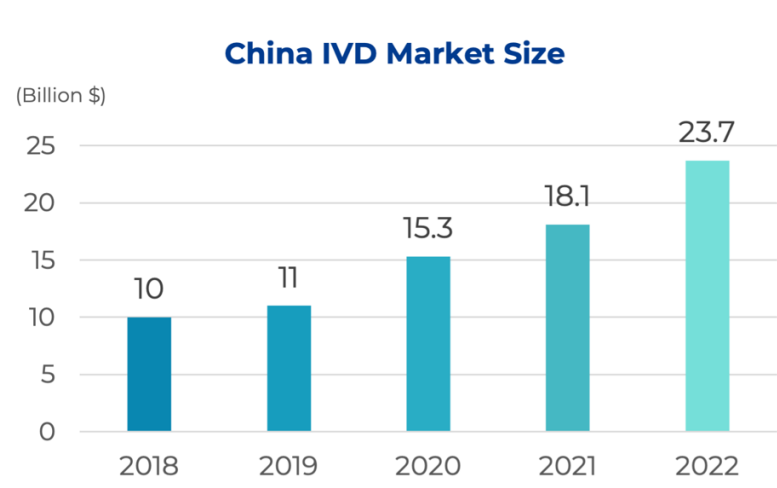

Over 1,100 exhibitors commit to attend the 2024 China Association of Clinical Laboratory Practice Expo (CACLP) and China IVD Supply Chain Expo (CISCE)

- *The 21st edition of CACLP and the 4th edition of CISCE will take place from **16 - 18 March** at **Chongqing International Expo Center, China**.*
- *Concurrent with the tradeshows, the 9th China Experimental Medicine Conference and Series Sessions, the 11th China IVD Industry Development Conference and Series Forums and a diverse range of activities will kick off from **15-17 March** in Chongqing as well.*
- *CACLP & CISCE 2024 have already confirmed **over 1,100 global exhibitors** since the sales kick-off in August, showcasing a strong confidence from the market and active engagement from the industry.*

As a remarkable start with more than 1,100 exhibitors already registered, CACLP & CISCE 2024 are set to take center stage to present the latest achievements within the in-vitro diagnostic (IVD) industry.

As one of the most welcomed host cities, Chongqing, strategically positioned as a gateway to China's west, adds to the allure of the premier event. What's more noteworthy is that, starting from August 30th, China has removed all pre-entry COVID-19 testing requirements for inbound travelers, essentially reverting the entry process to pre-pandemic standards. This full reopening of China, coupled with the gradual recovery of international flights direct from the world's major cities, make the event a global focal point for discovering the dynamic landscape and emerging opportunities of the industry.

In 2022, as reported by the China Association of In-Vitro Diagnostics, China's IVD market size reached USD 23.7 billion, up 30% year-on-year. (The Annual Report of China IVD Industry, 2023).

This rapid growth signals the IVD industry's pivotal role in China's healthcare sector but also brings forth challenges and opportunities. In response to the increasing need for continuous innovation and adaptation, both Chinese and international IVD players fervently explore new development methods and strategies.

Danaher Corporation, Roche, Abbott and other leaders in IVD globally have moved beyond the traditional model of investing in China for R&D centers and production bases. Instead, international companies now discover the more multifaceted strategy that involves deepening collaborations with local IVD companies, medical institutions, university research centers, and local governments.

Being a part of CACLP & CISCE and concurrent activities plays a crucial role in the strategy for China's IVD market. This event not only offers a valuable platform to showcase advancements, but also helps engage with the world's most promising IVD community. As emphasized by the upcoming edition's slogan — Shaping A Smarter Future Through Collaboration, CACLP & CISCE aims to facilitate the worldwide participants to gain access to essential talents and resources through their participation and fostering further development in the Chinese market through collaboration.

Diamond partners

Other partners

Looking forward, China's IVD market is expected to sustain its impressive growth trajectory over the next 5 - 10 years, driven by factors such as the aging population and the rising healthcare needs of a rapidly developing nation, as highlighted in The Annual Report.

Last month, China's State Council issued a detailed guideline for international companies to invest in China including guaranteeing international companies the same treatment as Chinese enterprises, encouraging foreign-backed companies and their R&D centers to undertake major scientific research projects, and strengthening the protection of intellectual property rights.

As the industry continues to evolve, it is clear that all parties within the industry are ready to make significant contributions to its ongoing innovation and development. CACLP & CISCE is no exception and will continue to serve as one of the largest exhibitions in the IVD industry worldwide, welcoming IVD players from around the globe.

About GL events

GL events is a world-class leading provider of integrated solutions and services for events operating across the 3 major core divisions: Venues (venue management), Exhibitions (exhibition organizing) and Live (event services).

Through its wide global network made up of more than 90 offices, with organizing over 480 proprietary trade fair and events, managing more than 60 venues, and staging more than 4,200 events every year, GL events Group is a critical force for city promotion of 28 MICE destinations.

Present on five continents with operations in more than 20 countries, GL events has over 5,119 employees. Listed on the Eurolist Euronext Compartment B (Paris Stock Exchange), GL events had a turnover of €1.315bn in 2022.

About CACLP

Debut launched in 1991, CACLP, the China Association of Clinical Laboratory Practice Expo, is well established as one of the largest exhibitions in the in vitro diagnostic industry worldwide. CISCE, China IVD Supply Chain Expo, successfully launched in 2021, further expands the product sectors from upstream to downstream. With a great number of high-level academic and educational programs held concurrently onsite, and year-round promotional solutions, CACLP proves itself as one of the most important platforms for global IVD players.

In 2020, CACLP formed the joint-venture company with GL events to start the internationalism strategy.
