### CACLP & CISCE 2024 Draw Global Attention to Innovations and Collaborations in IVD Industry

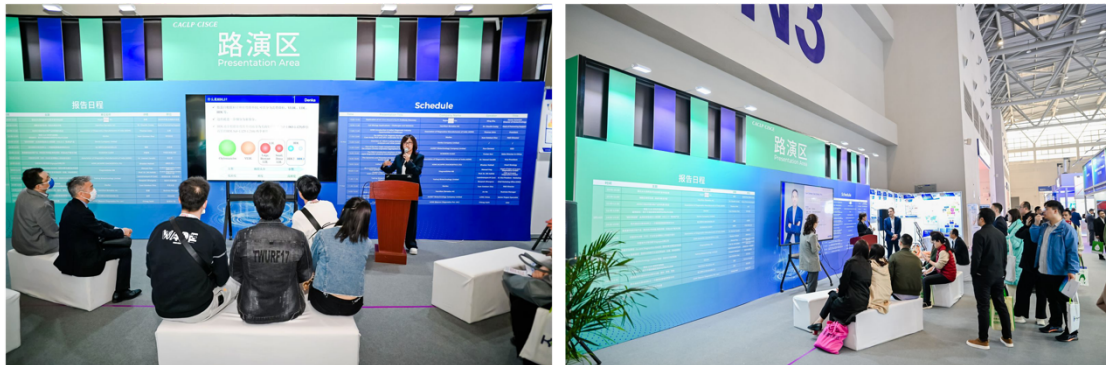

Chongqing, China - From 16 to 18 March 2024, the bustling halls of Chongqing International Expo Center witnessed a remarkable convergence of innovations and advancements, as the 21<sup>st</sup> China Association of Clinical Laboratory Practice Expo (CACLP) and the 4<sup>th</sup> edition of China IVD Supply Chain Expo (CISCE) concluded with resounding success.

Occupying an expansive 130,000 sqm exhibiting area across 9 halls, CACLP & CISCE 2024 hosted over 1,300 global exhibitors spanning the in vitro diagnostics (IVD) industry chain. In a continuous effort to enhance the experience for both exhibitors and visitors, for the first time ever, the two expos were thoughtfully divided into 6 specialized areas (Instruments and Reagents, Raw Materials, Components, Consumables, General Lab Equipment, and Supply Chain) and ensured a more focused and impactful engagement for all involved.

The impact of CACLP & CISCE 2024 was evident as nearly 50,000 visitors, comprising industry professionals, researchers, and end users, flooded the event by its closure on 18 March. With exhibitors hailing from 19 countries and regions, and professional visitors representing 54 nations, Chongqing became a global hub of IVD innovation during the event.

Notable participants, including international giants such as Danaher Corporation, Roche and Abbott, as well as prominent Chinese IVD companies like Zybio, Mindray, YHLO, Maccura, Autobio, Wondfo and Snibe, together with the Berlin-Brandenburg joint-booth exhibitors and the Association of Diagnostics Manufacturers of India, significantly enriched the exhibition's diverse array of offerings. Additionally, the introduction of daily roadshows at the International Pavilion provided an integrated and targeted stage for exhibitors to spotlight cutting-edge products and technologies on a global scale.

From 15-17 March, the 9<sup>th</sup> China Experimental Medicine Conference (CEMC) and series sessions, the 11<sup>th</sup> China IVD Industry Development Conference (CIIDC), the 6<sup>th</sup> China IVD Distribution Enterprise Forum (CIDEF), Enlightening Lab Med - the 7<sup>th</sup> IVD Youth Entrepreneur Forum (ELM·Y), the 4<sup>th</sup> China Key Raw Material & Parts Forum (CKRMPF) as well as the 1<sup>st</sup> International Laboratory Medicine & IVD Forum, were successfully held.

The concurrent academic events welcomed over 300 academicians, renowned experts and scientists in experimental medicine, biomedical engineering and related fields, delivering captivating presentations and attracted over 5000 attendees onsite. Besides, the 11<sup>th</sup> CIIDC marked the official release of the latest In Vitro Diagnostic Industry in China, and The Annual Report of China IVD Industry, providing comprehensive analysis and authoritative insights into the field. At the 9<sup>th</sup> CEMC, Prof. Khosrow Adeli, past president of the International Federation of Clinical Chemistry and Laboratory Medicine (IFCC), officially signed the strategic cooperation agreement between IFCC and PCEM & CAIVD & CACLP. The 1<sup>st</sup> International Laboratory Medicine & IVD Forum, jointly organized by CAIVD, PCEM and IFCC and hosted by CACLP, greatly facilitated global academic exchange.

The influx of international participants at CACLP & CISCE 2024 brought forth diverse opportunities and collaborations, revitalizing both China's and the Asia-Pacific IVD market. Our commitment to *Shaping A Smarter Future Through Collaboration* was underscored throughout the 2024 event, serving as a catalyst for continuous innovation, collaboration, and advancement in the IVD field. Looking ahead, an increased international engagement can be anticipated in our upcoming academic events and we remain dedicated to realizing new goals that drive the industry forward.

The 22<sup>nd</sup> CACLP and 5<sup>th</sup> CISCE will return next March, stay tuned with us.

China Association of Clinical Laboratory Practice Expo

### **About CACLP**

Debut launched in 1991, CACLP, the China Association of Clinical Laboratory Practice Expo, is well established as one of the largest exhibitions in the in vitro diagnostic industry worldwide. CISCE, China IVD Supply Chain Expo, successfully launched in 2021, further expands the product sectors from upstream to downstream. With a great number of high-level academic and educational programs held concurrently onsite, and year-round promotional solutions, CACLP proves itself as one of the most important platforms for global IVD players.

In 2020, CACLP formed the joint-venture company with GL events to start the internationalism strategy.
