EXHIBITOR TESTIMONIALS

Richard YIU
General Manager, Roche Diagnostics (Shanghai) Ltd.

Roche, as a leading global provider of innovative in vitro diagnostics solutions and a pioneer in multinational healthcare cooperation, has contributed to the development of the in vitro diagnostic industry of China for more than 20 years by continuously organizing comprehensive academic activities and being devoted to exhibitions, including CACLP, one of the most important and recognized exhibition in China with more than 30 years of history. Roche will remain one of the most trusted partners of CACLP, as the rich academic resources and integrated media networking of CACLP have greatly aided Roche in China market development. Roche will continue to cooperate closely with CACLP to construct digital patient engagement platforms to interact patients with healthcare providers globally and facilitate the enhancement of the Chinese healthcare ecosystem. Together, we are passionate about doing now what patients need next.

Xiaoliang LUO
General Manager, Chinese Sales & Marketing, IVD Division
Shenzhen Mindray Bio-Medical Electronics Co., Ltd.

CACLP has witnessed the development and growth of China's IVD industry over the past two decades. As both a witness and catalyst in this sector's evolution, Mindray has consistently aligned with this significant event. On this fertile ground that has nurtured countless innovations, we have journeyed with partners from the pioneering days of hardship to the current thriving landscape of industrial prosperity. We stand as both trailblazers in IVD technological breakthroughs and collaborators in building the industry ecosystem. May global partners join this "Eastern Promise" – where the collision of ideas ignites sparks of wisdom – and together let us compose a magnificent chapter in the era of in vitro diagnostics!

DISTRIBUTORS & THEIR SPECIAL EVENTS

The Distributor Division of CAIVD is made of **150** renowned national trading companies from IVD sector. Every year, they gather at the CACLP Expo and participate in the concurrent trading-focused event - **the China IVD Distribution Enterprise Forum**. The forum provides a platform for global trading companies to share resources and exchange experiences. Key member of the division includes:

Frontage Laboratories

Beibu Dulf Medical

Jiangxi Le Cheng Biological Technology Co., Ltd.

Hunan Yiyang Jinhong Technology Co., Ltd.

Shanghai Runda Medical Technology Co., Ltd.

Changji Medical

Guangzhou Weimi Bio-Tech Co.,Ltd

Huayue Health Industry Group

Nanjing Health Flow Biotechnology

Yinchuan Shenli Science Trade Co., Ltd.

Henan Medrui Medical Service Supply Chain Co., Ltd.

Jiangsu Yingke Xinchuang Medical Technology Co., Ltd.

Kecsea Co., Ltd.

Xi'an Fuda Diagnostic Reagent Co., Ltd.

Guangxi Beibu Gulf Medical

Shandong Ruike Medical Technology Co., Ltd.

Sinopharm Runda Medical Supply Chain Services (Shanghai) Co., Ltd.

Anhui Huibang Biological Engineering Co., Ltd.

Chongqing Oumai Medical Equipment Co., Ltd.

RayKol Group Corp., Ltd.

CONCURRENT EVENTS

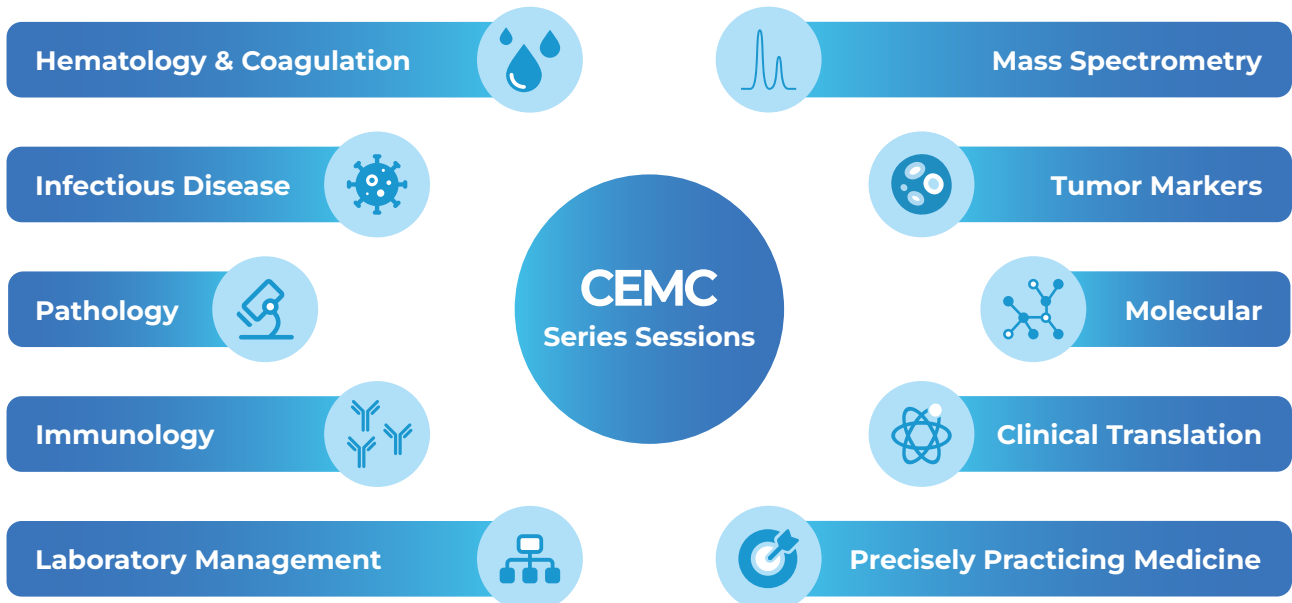

CEMC
 China Experimental
 Medicine Conference

21-22 MARCH, 2026
 XIAMEN, CHINA

THE 11TH CHINA EXPERIMENTAL MEDICINE CONFERENCE

The China Experimental Medicine Conference is an annual academic conference hosted by China Professional Community of Experimental Medicine (CPEM). The conference invites several international scientists in the fields of laboratory medicine, biomedical engineering, and related disciplines to deliver exciting academic lectures. It also facilitates extensive discussions and exchanges on the latest developments, cutting-edge technologies, and advanced research achievements to collectively promote the healthy development of laboratory medicine.

CIIDC
China IVD Industry
Development Conference

21-22 MARCH, 2026
XIAMEN, CHINA

THE 13TH CHINA IVD INDUSTRY DEVELOPMENT CONFERENCE

The China IVD Industry Development Conference is an annual conference hosted by China Association of In-Vitro Diagnostics (CAIVD). Each year, it conducts in-depth discussions and explorations on a wide range of topics, including policy and regulations, business operation, innovative research and development, international development, and sustainable industry. Several renowned experts, scholars, and entrepreneurs from the IVD industry share comprehensive and deep insights onsite of the event.

**Enlightening Lab Med -
The 9th IVD Youth Entrepreneur Forum**

The 8th China IVD Distribution Enterprise Forum

The 6th China Key Raw Material & Parts Forum

21-22 MARCH, 2026
XIAMEN, CHINA

THE 1ST CHINA AI & DIGITAL TWIN MEDICINE CONFERENCE

To promote the deep integration of AI and Digital Twin technologies in medical research, clinical practice, and industry, The 1st China AI & Digital Twin Medicine Conference provides a high-level interdisciplinary platform. The conference gathers experts across medicine, bioengineering, and computer science to discuss cutting-edge advances in diagnostics, research innovation, and AI agents. The mission is to drive data-and-model-led intelligence, enhancing both the precision and efficiency of healthcare services.

GO GLOBAL: CHINA IVD INTERNATIONAL FORUM

This forum focused on key topics including regional market insights, product registration and compliance, channel strategy, and overseas localization, bringing together government agencies, industry associations, professional advisors, and leading domestic and international companies for in-depth exchange.

CACLP INTERNATIONAL NIGHT

CACLP International Night brings together academic experts, industry representatives, international exhibitors, and partners from around the world to exchange ideas, build connections, and advance global collaboration in the IVD industry in a relaxed, open setting.

THE 2ND NATIONAL PRIMARY HEALTHCARE LABORATORY FORUM

This forum focused on supporting primary healthcare institutions in achieving systematic advancement in specialty development, service capacity, and operational efficiency. It examined practical and innovative approaches to strengthening laboratory testing capabilities, refining service delivery models, and enhancing quality management frameworks at the primary care level. Through these discussions, the forum sought to facilitate progress in standardized service models, ensure greater consistency and harmonization of laboratory results, and promote innovation in management practices across primary healthcare settings.

AT-HOME TESTING PAVILION

The At-Home Testing Pavilion showcases the latest innovations in home diagnostics, focusing on user-centric product demonstrations, integrated health monitoring solutions, consumer engagement, and channel ecosystem connectivity to drive growth in the home IVD testing market.

IFCC PRESIDENT'S MESSAGE

As the President of the International Federation of Clinical Chemistry and Laboratory Medicine (IFCC), I extend my heartfelt congratulations to CACLP, the China Association of In-Vitro Diagnostics (CAIVD), and the China Professional Community of Experimental Medicine (CPCEM) for successfully organizing this milestone event.

Leading experts, researchers, and key industry players from around the world convened to exchange knowledge, present cutting-edge innovations, and explore the future of laboratory medicine and in vitro diagnostics.

The scientific program was both comprehensive and of exceptional quality, drawing impressive attendance and generating enthusiastic engagement throughout. More than one hundred scientific sessions, workshops, and activities ran concurrently, highlighting the depth and diversity of the program. The strong participation reflected the high value placed on the sessions, the excellence of the speakers, and the relevance of the topics covered.

A major highlight of the event was the exceptional exhibition, which spanned five expansive halls—making it the largest of its kind in the world. The exhibition showcased cutting-edge state-of-the-art technologies, innovative products, emerging solutions across the diagnostic spectrum, and the latest developments from across the IVD industry, offering attendees a unique opportunity to explore the full spectrum of the diagnostic landscape, the rapid evolution and global importance of the IVD industry.

Beyond its scientific and technical achievements, the Congress served as a vibrant platform for international collaboration. It was a valuable opportunity to engage with colleagues from China and the IFCC, and to explore meaningful pathways for future cooperation. The potential for deeper collaboration between IFCC and China is both exciting and full of promise, offering new opportunities to advance laboratory medicine and improve healthcare worldwide.

Prof. Dr. Tomris OZBEN
IFCC, President

BRITISH IN VITRO DIAGNOSTIC ASSOCIATION DIRECTOR'S MESSAGE

Absolutely honoured to have represented the industry via BIVDA at CACLP in Xiamen, China.

From being asked to graciously cut the ribbon at the opening ceremony to participating in round tables, presentations, visits to innovative Life Science zones and networking dinners, it is clear that China represents an extraordinary opportunity for UK companies.

Not only will increased collaboration benefit both country's healthcare systems, it will also help address a global market's need for innovative health technology at scale.

Jag GREWAL
BIVDA, Director and Treasurer

KOREA IN VITRO DIAGNOSTIC ASSOCIATION CHAIRMAN'S MESSAGE

CACLP 2026 once again demonstrated the impressive technological growth and global competitiveness of China's IVD industry. Congratulations on a highly successful exhibition.

The Korea Pavilion, hosted by KIVDA, served as a vital platform for showcasing Korean innovation and building connections with global stakeholders.

We look forward to CACLP continuing to strengthen the partnership between Korea and China as we advance together into the global market.

Eui Yul CHOI
KIVDA, Chairman

THE VOICES

Yingyong HOU | Pathology Dept., Zhongshan Hospital

In recent years, the Convergence of Laboratory Medicine & In Vitro Diagnostics gathers experts from industry, colleges and R&D teams for face-to-face in-depth exchanges and discussions on site. It gives me an opportunity to understand the industry trends, innovative solutions, as well as on-site contact with the latest technology and equipment. It has given us valuable reference to continuously improve the capacity of pathology diagnosis and introduce standardized and high-quality diagnosis and treatment resources for patients.

Chengbin WANG | Chinese PLA General Hospital

At the annual Convergence of Laboratory Medicine & In Vitro Diagnostics, I communicate with scientists from all over the world to share experiences and technologies, which not only expands my professional horizons, but also brings me new ideas and inspirations.

Christian ULLEGÅRD | Reactlab

We normally visit Medica in Germany where they only have 2 halls dedicated to IVD, so here there was a lot more companies. The fair is also a great opportunity to see the "real" size of the companies. Big companies like Autobio and Zybto normally participate with small to medium sized booths in Europe and the US. So CACLP was also an opportunity to see what kind of companies we are working with in their own market.

Thomas JOHN | Association of Diagnostics Manufacturers of India (ADMI)

It is truly inspiring to witness the global impact of CACLP, an event that seamlessly brings together the brightest minds and innovators in the IVD industry. As the Indian IVD Manufacturers' Association (ADMI) joins hands with CACLP, we foresee a new era of collaboration, technological partnership, and shared innovation. This platform not only strengthens global networks but also paves the way for meaningful advancements that will shape the future of diagnostics worldwide. We look forward to continued engagement with CACLP, driving transformative solutions and creating a more connected and dynamic IVD community.

Youbin QIU | Huayue Health Industry Group

CACLP is a great opportunity for me to learn about the latest developments in the industry, and I always find many innovative products and technologies here. We have established connections with various outstanding companies and professionals on site, all of which provide a wealth of resources to support our future business development.

Lu HAN | China News Service

CACLP is the prime exhibition for IVD industry in China and Asia-Pacific region. As a medical journalist, CACLP is an important way for me to learn about the latest developments and new products and technologies in Chinese IVD industry. At the same time, the exhibition also allows me to exchange the latest research results with professionals, as well as updating me with cutting-edge information on the industry.

Yao YUAN | XINHUANET

CACLP is a very cutting-edge industry event in China, focusing on the top companies and cutting-edge technologies. As an authoritative media we will continue to pay attention and publicize it as well.
